

ASX Announcement

29 June 2016

DOOLGUNNA DIAMOND DRILLING UPDATE

RNI NL (ASX: RNI) advises that the diamond drilling rig is scheduled to arrive on July 8 at the Cuba copper-gold prospect at RNI's Doolgunna Project in Western Australia's Bryah Basin.

As set out in the ASX announcement of 28 June 2016, RNI plans to drill a ~800 metre diamond hole at Cuba beneath the anomalous zone defined from previous reverse circulation (RC) drilling.

The deep diamond hole will enable RNI to conduct a down-hole electro-magnetic (DMEM) survey to vector in on the targeted volcanic hosted massive sulphide (VHMS) system.

For and on behalf of the RNI Board.
