

ASX Announcement

9 January 2012

**RESOURCE AND INVESTMENT NL (RNI) TO BECOME AUSTRALIAN
GOLD PRODUCER FOLLOWING \$35M DEAL TO ACQUIRE FORTNUM
PROJECT AND EXTENSIVE TENEMENT PACKAGE**

*COMPANY-MAKING ACQUISITION DELIVERS 1.2Moz JORC RESOURCE, PROCESSING PLANT
AND OUTSTANDING EXPLORATION UPSIDE*

HIGHLIGHTS

- RNI to acquire Grosvenor Gold, owner of the Fortnum Gold Project and extensive 1,791km² tenement package in WA, from BlueCrest Mercantile Master Fund Limited.
- Acquisition will increase RNI's footprint in the Bryah-Padbury Basin more than five-fold to 2,225km², including 100km strike of Narracoota Volcanics, host of the world-class DeGrussa copper-gold deposit.
- +100 walk-up drilling targets with outstanding exploration potential for new lode gold and VMS copper-gold discoveries.
- Existing 1.2Moz resource base and 1Mtpa processing plant offers path to near-term production.
- \$35M consideration to BlueCrest to comprise \$20M cash and \$15M in RNI shares.
- Argonaut engaged to conditionally underwrite \$30M in equity funding.
- New Holland Capital to arrange debt facility of approximately \$20M to fund plant re-commissioning and provide additional working capital.

Resource and Investment NL (ASX: **RNI**) (RNI or the Company) is pleased to announce that it is poised to become a gold producer, with significant exploration upside, following a deal to acquire the **Fortnum Gold Project** and surrounding exploration tenements in WA's highly prospective Bryah Basin for a total consideration of **\$35 million** in cash and shares.

Fortnum hosts a JORC-compliant resource of 1.2 million ounces at a grade of 2.2g/t and has more than 100 walk-up drilling targets based on an extensive exploration database compiled by previous owners, offering outstanding exploration potential for both lode gold and VMS copper-gold deposits.

As part of the acquisition, RNI will gain the 1Mtpa Fortnum processing plant, which the Company plans to bring back into production within 12-18 months.

The acquisition will significantly increase RNI's strategic footprint in the Bryah-Padbury Basin from 434km² currently to 2,225km².

This will make RNI a dominant tenement holder in the region with control of a 100km strike length of the highly prospective Narracoota Volcanics, host to the world-class DeGrussa copper-gold deposit currently being developed by Sandfire Resources.

RNI has reached agreement to acquire the Fortnum Project following a tender process conducted by Cayman Island hedge fund BlueCrest, which took ownership of the project after the former operator fell into receivership in a low gold price environment.

PROJECT SUMMARY

The Fortnum Project, owned by BlueCrest subsidiary Grosvenor Gold Pty Ltd, is located 170km north-west of Meekatharra in WA (*see Figure 2 attached*). The acquired assets include:

- 11 granted Mining Leases (ML's) and 51 Exploration and Prospecting Leases (EL's and PL's) (*see Table 2 attached – Tenement Schedule*);
- open pit and underground resources in multiple deposits totalling 1.2Moz (*see Table 1 attached – Resource Inventory*);
- a carbon-in-leach (CIL) gold processing facility with a nameplate capacity of around 1Mtpa which was in production until May 2007(*see Figure 1 below*);
- an extensive exploration portfolio extending over a total area of 1,791km² stretching from the Great Northern Highway over 100km westwards, covering an approximate 100km strike length of Narracoota Volcanics. The tenements are prospective for both lode gold and VMS-style deposits similar to the nearby DeGrussa copper-gold discovery;
- a +100-person accommodation village, airstrip and other utilities including communications, all located within 1km of the Fortnum mine site;
- a tailings storage facility and borefield; and
- a 40 per cent stake in the Robinson Range Iron Ore Project in WA managed by PepinNini Minerals.

Figure 1 – 1Mtpa Fortnum Gold Processing Plant

ACQUISITION DETAILS

RNI has entered into a Sale & Purchase Agreement with BlueCrest Mercantile Master Fund Limited under which RNI will acquire all the issued capital of Grosvenor Gold Pty Ltd for a total consideration of \$35 million payable as \$20 million in cash and \$15 million of fully paid ordinary shares in RNI. Grosvenor Gold owns the Fortnum Mining Project and surrounding exploration tenements.

RNI will fund the cash component of the acquisition through an equity raising to be managed and conditionally underwritten by Argonaut Capital Ltd.

In addition, New Holland Capital will arrange a debt facility of approximately \$20 million to fund the re-commissioning of the gold treatment plant and to provide additional working capital.

On completion, the equity financing of approximately \$30 million and the debt facility of approximately \$20 million will ensure RNI has sufficient funding to complete the acquisition and to pursue an aggressive exploration strategy as set out below.

The acquisition, the issue of shares to BlueCrest and components of the equity financing will require the approval of RNI shareholders. The date of the EGM at which shareholders can vote will be set after the price of the equity financing and share issue has been set. The pricing of the equity financing and share issue will be set on or before 20 January 2012.

FUTURE STRATEGY

Upon completion of the transaction, RNI will continue an extensive review of the assets with a particular emphasis on the existing JORC resource base at Fortnum and the vast exploration database.

As part of this review, RNI will finalise a mine plan, which has been reviewed by independent consultants, to resume gold production at Fortnum within 12-18 months. This plan forecasts initial gold production of approximately 50,000oz per annum at a forecast cash cost of A\$826/oz.

During this time, the Company will pursue a two-pronged approach which will see it undertake an extensive exploration program while also completing a \$10.2 million re-commissioning of the gold treatment plant.

The work to refurbish and re-start the gold treatment plant will be funded from part of the proceeds of the debt facility of approximately \$20 million to be arranged by New Holland Capital. The debt facility will also provide ongoing working capital.

This strategy is aimed at enabling the Company to generate strong cash flow from production in the near-term, while at the same time growing the reserve and resource inventory with a view to further increasing mine life, production and cash flow.

SIGNIFICANT EXPLORATION UPSIDE

In addition to the physical assets, Grosvenor Gold has exploration data, assays and other intellectual property related to the properties. This includes an extensive drilling, geophysical and geochemical database and records, including information on preliminary exploration programs undertaken by previous explorers for gold deposits before the discovery of DeGrussa transformed the exploration potential of the region.

In recent years Grosvenor Gold has retained West Perth-based exploration consultancy CSA Global to progress exploration of these tenements, including current geophysical programs such as ground EM and micro-gravity surveys.

The Fortnum Project and surrounding tenements represent a dominant tenement position, and one of the most prospective, in the Bryah Basin. The acquisition will complement RNI's existing 434km² tenement package, which includes the flagship Doolgunna Project located immediately south of DeGrussa.

The package includes more than 100 walk-up drilling targets, providing an outstanding opportunity for RNI to increase the current gold resource inventory and to target the discovery of new copper-gold deposits similar to DeGrussa.

RNI Executive Chairman Miles Kennedy said he was delighted to have secured a deal to buy the highly sought-after Fortnum Project and exploration assets from BlueCrest.

"This represents a company-making acquisition for RNI which offers a compelling combination of near-term production potential and exploration upside," said Mr Kennedy.

"Quality acquisition opportunities in the Australian mining and exploration industry are increasingly difficult to identify. This standout opportunity will give RNI the ability to join the ranks of Australian gold producers within 12-18 months as well as to consolidate a world-class exploration portfolio in one of Australia's hottest exploration provinces – the Bryah Basin of Western Australia."

ASCIDIAN OPTION

RNI has reached agreement with Ascidian Prospecting Pty Ltd to vary the terms of an option agreement signed in April 2010 to acquire 100% of the flagship Doolgunna Project (E52/2438).

Under the deed of variation, Ascidian will receive \$50,000 cash and two million RNI options exercisable at \$1 by 25 November 2013.

Upon exercising of the option to acquire the Doolgunna Project, RNI will pay Ascidian \$2 million cash and three million ordinary fully paid RNI shares.

This replaces the original agreement terms, under which Ascidian was previously entitled to shares in RNI equivalent to 20% of the Company upon exercise of the option to acquire the Doolgunna Project.

Ascidian will retain a royalty of 1.5% of any metals or minerals recovered from the tenement. The deed of variation with Ascidian will take effect contemporaneously with the completion of the BlueCrest transaction.

Competent Person's Statement

The information in this ASX release that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Albert Thamm, who is a Fellow and Chartered Professional of the Australasian Institute of Mining and Metallurgy. Mr Thamm is a Geological Consultant to and Director of Resource and Investment NL and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code of Reporting of Mineral Resources and Ore Reserves. Mr Thamm consents to the inclusion in the release dated 3 January 2012 of the matters based on information in the form and context in which it appears.

Forward-Looking Statements

This announcement has been prepared by Resource and Investment NL. This document contains background information about Resource and Investment NL current at the date of this announcement.
